The Epidemic in Florida

Population in 2013: 19.2 million →

(4th in the nation)

Newly diagnosed HIV infections in 2013: 4,864**

(2nd in the nation in 2011)

Newly diagnosed AIDS cases in 2013: 2,532**

(3rd in the nation in 2011)

Cumulative pediatric AIDS cases reported through 2013: 1,547

(2nd in the nation in 2011)

Persons *diagnosed* and living*
with HIV disease through 2012: 105,627 →**

(3rd in the nation in 2010)

HIV prevalence estimate through 2012: 125,000

(11.4% of the U.S. estimate for 2010)

HIV Incidence Estimates 2010: 3,454

(There was a 30% decrease from 2007-2010)

HIV-related deaths in 2012: 923

(Down 8.2% from 2011.

The first time to ever be under 1,000 deaths in a given year.)

57% White
15% Black
23% Hispanic
4% Other*

29% White
49% Black
20% Hispanic
2% Other*

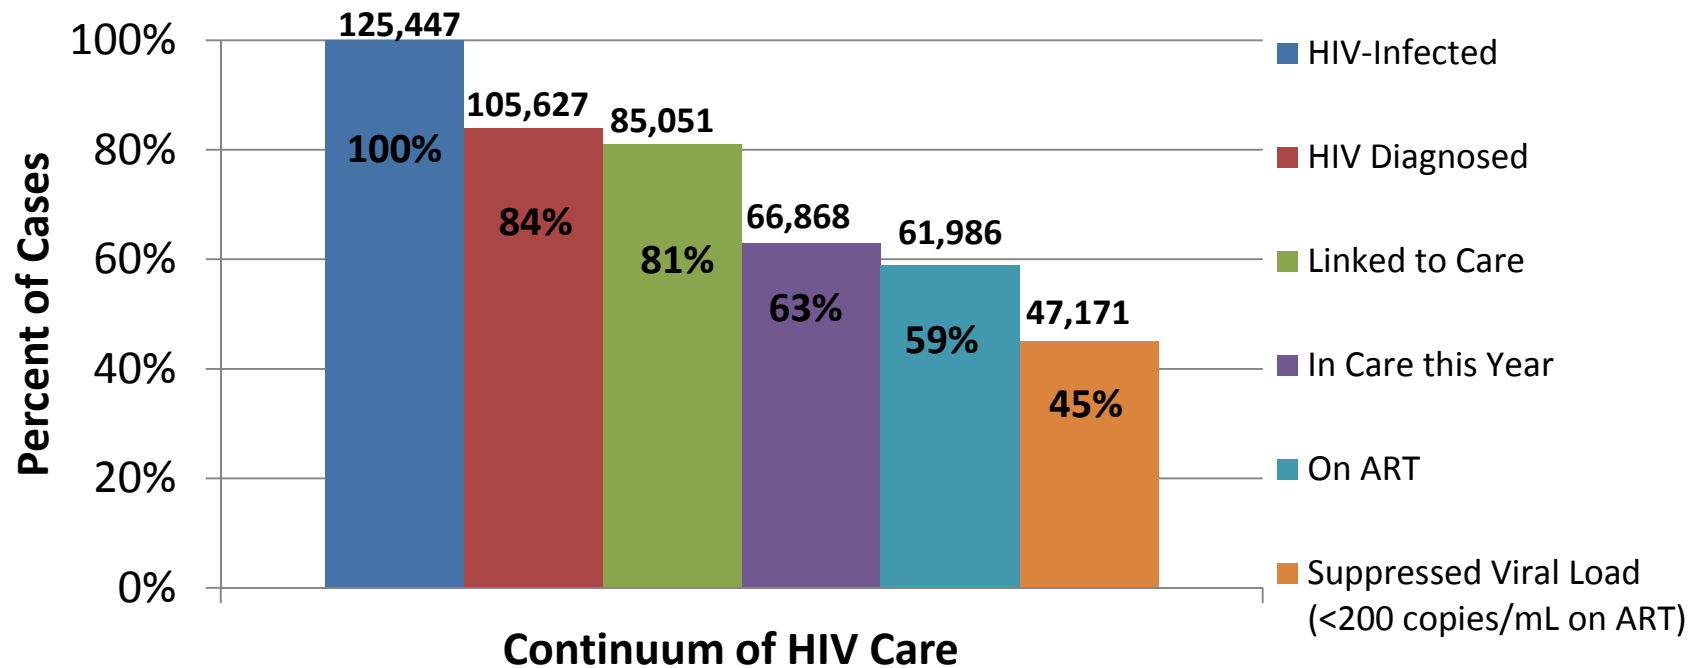

*Other = Asian/Pacific Islanders; American Indians/Alaskan Natives; multi-racial.

**Data by year of diagnosis for 2013 are incomplete and should be interpreted with care

*** Living (prevalence) data as of 06/30/2013

Number and Percentage of HIV-Infected Persons Engaged in Selected Stages of The Continuum of HIV Care — Florida, 2012

- HIV-infected=HIV diagnosed cases divided by 84.2% (to account for 15.8% national estimated unaware of their status in Florida). The 2011 indicator report (http://www.cdc.gov/hiv/pdf/2011_Monitoring_HIV_Indicators_HSSR_FINAL.pdf) estimates that 15.8% are undiagnosed (Table 9a) – this report uses 2010 data and was published in October 2013.
- HIV Diagnosed=Number of cases known to be alive and living in Florida through 2012, regardless where diagnosed, as of 06/30/2013 (used for unmet need calculations), plus an additional 4% to account for OOS in care, but not yet entered into eHARS.
- Linked to Care (Ever in Care) =Based on calculated data of persons living with HIV disease in Florida (regardless of where diagnosed) who ever had a CD4 or Viral load test in the eHARS dataset. (National estimates are 77%).
- In Care this Year=Based on Unmet calculations as prescribed by HRSA, for persons living with HIV in Florida (regardless of where diagnosed) and having at least 1 HIV-related care service involving either a VL or CD4 test, or a refill of HIV-related RX, plus 5% for unreported/missing labs and plus 6% for OOS cases known in care, but not yet entered into eHARS. (National estimates for in care are 57%).
- On ART=Estimated 92.7% of In care this year in Florida per MMP (National estimates are 88%)
- Suppressed VL=Estimated 76.1% on ART are in care this year in Florida per MMP (National estimates are 77%).

What is HIP?

Required Components and Activities

- HIV Testing
- Prevention for Positives
- Condom Distribution
- Policy
- Prevention Planning
- Capacity Building and Technical Assistance
- Monitoring/Evaluation and Quality Improvement

Recommended Components

- Prevention for high-risk negatives
- Social marketing, media and mobilization
- PrEP/PEP

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP 2013 Funding Overview

- Current funding (Category A and B): approximately **\$32.7 million**
- Represents a 33% increase in CDC funds since 2011
- Funds directed towards areas most heavily impacted: Miami-Dade had 104% increase and Broward 88% since 2011
- Sequestration cuts in 2013 reduced budget by almost \$2 million
- Funding expected to increase through 2016

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP 2013 Contracts Overview

- Total funding in contracts*: **\$12.5 million**
- Total number of contracts: **85**
- Of these contracts, **84 (99%)** targeted racial/ethnic minorities in their service areas; and **68 (80%)** targeted gay, bisexual and other MSM, as well as transgender individuals

* Prevention contracts providing direct client services (HIV testing, linkage, etc.); Includes HIP, MSM/Trans, Broward RFA, ETI, TOPWA and MAI contracts.

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIV Testing and Linkage

- Testing conducted in a wide variety of settings, through county health departments (CHD), private providers and contracts with CBOs
- Category A: Contracts including HIP, MSM/Trans, Broward RFA, TOPWA, CDC directly funded and CHD testing
- Category B: Expanded Testing Initiative (ETI), contracts with healthcare and non-healthcare providers and CHD testing

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIV Testing and Linkage

- Total HIV tests conducted: **428,203**
- Of that total, **2,757** were *newly* diagnosed; of those **75.6%** were linked to medical care
- Of the **1,660** *previously* diagnosed HIV-positive tests, **85.8%** were re-engaged in medical care

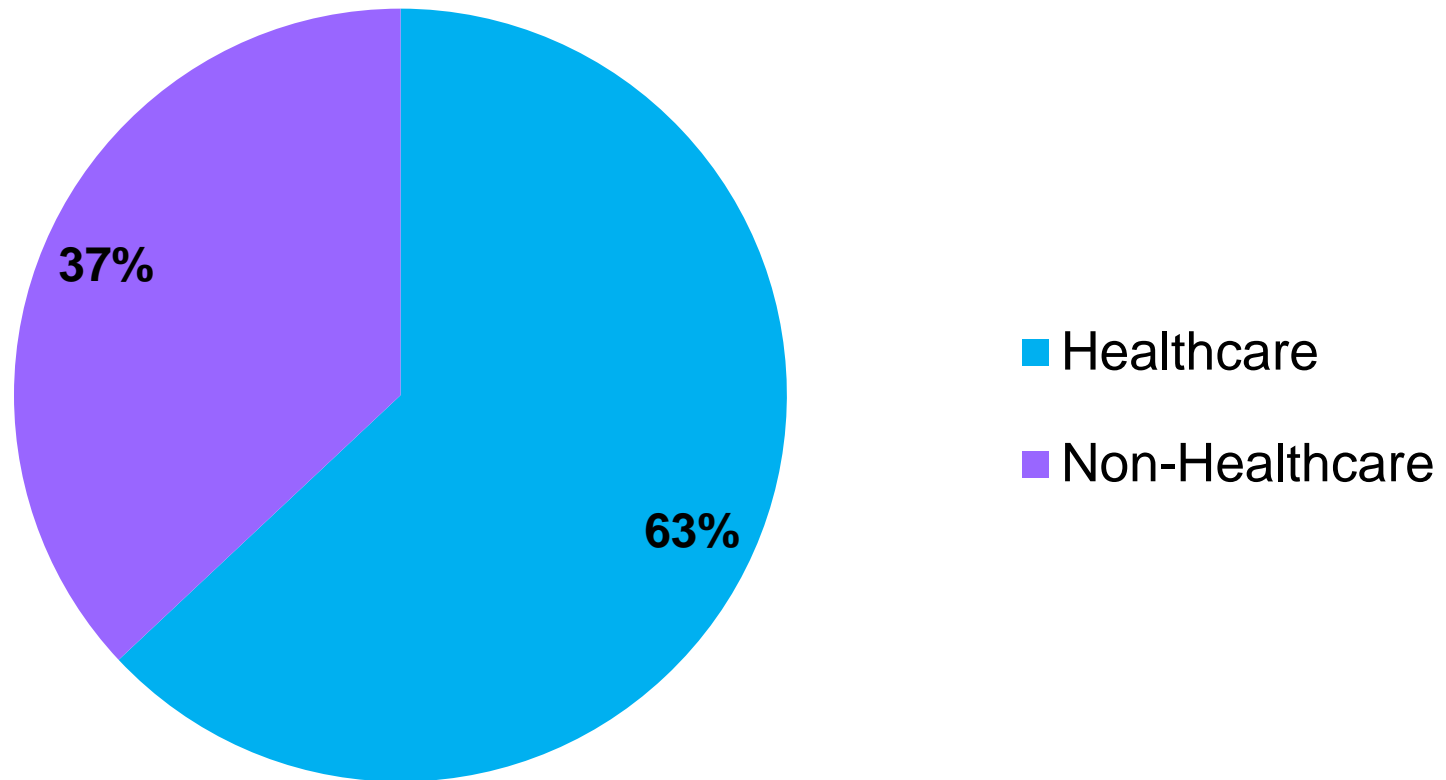

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIV Testing by Setting Type, Florida, 2013

N= 428,203

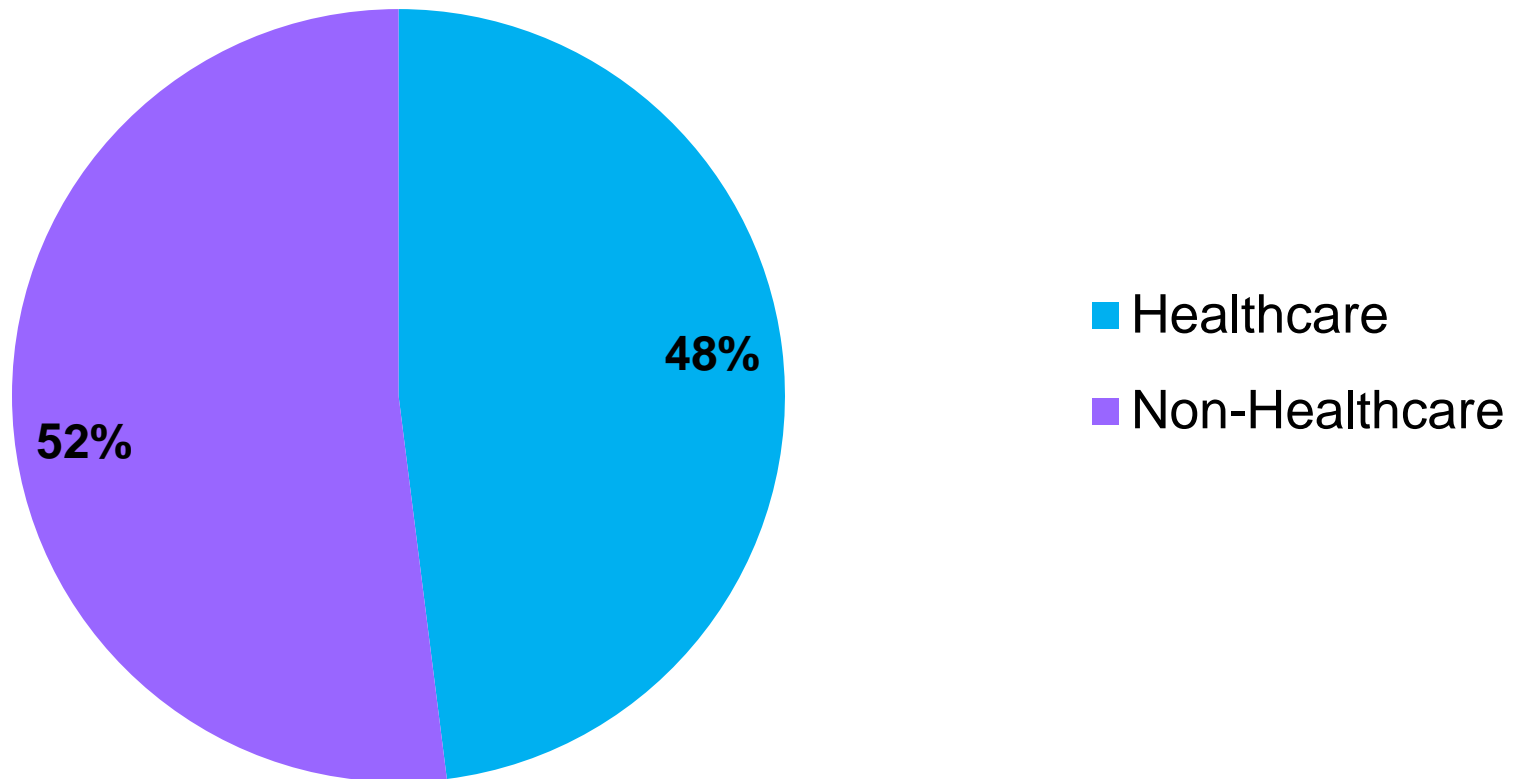

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Newly Diagnosed HIV-Positive Tests by Setting Type, Florida, 2013

N= 2,757

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Comprehensive Prevention with Positives (PwP)

- PwP umbrella includes: linkage to care, interventions to improve retention/re-engagement in care, behavioral/risk reduction interventions and interventions to prevent mother-to-child transmission.
- As a result of HIP, prevention efforts were shifted to focus more on PwP and align with the NHAS

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Peer Navigation Programs

(County Health Departments)

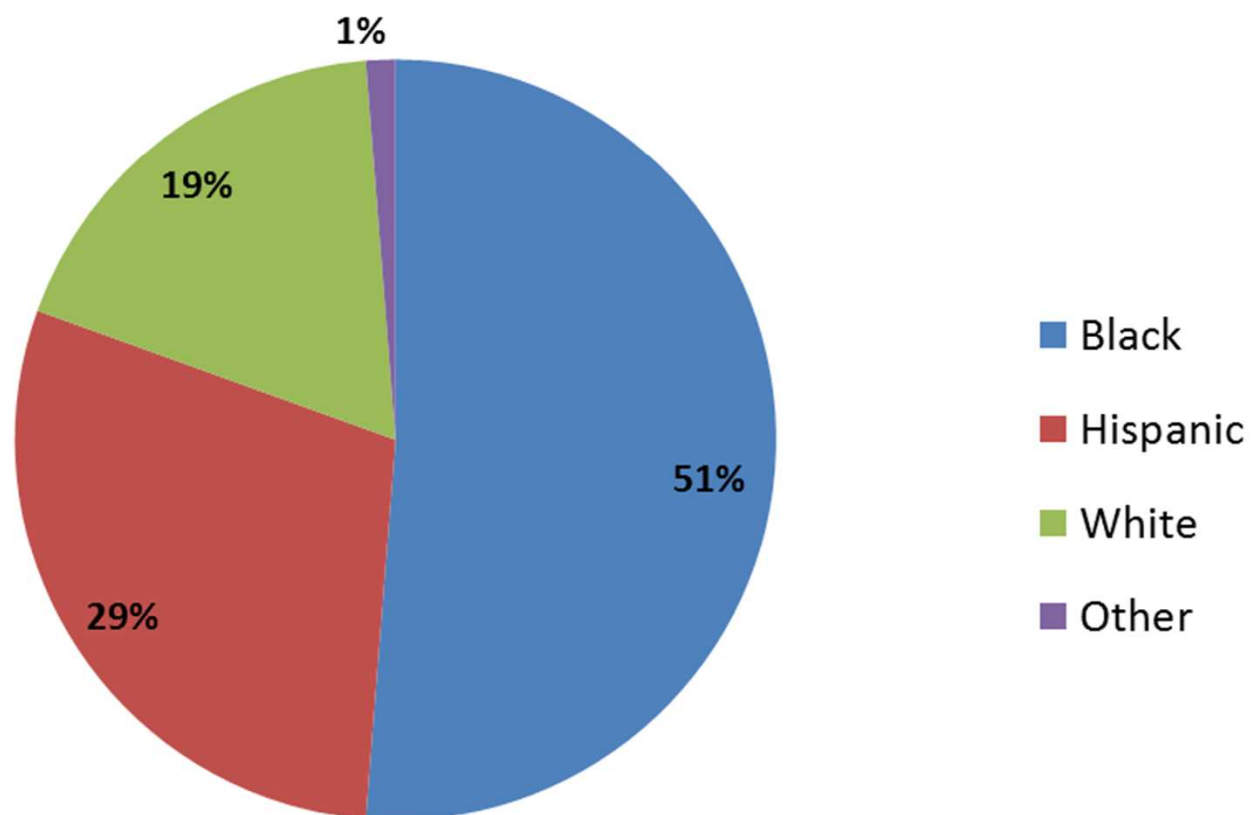

- Total programs: **4** (Duval, Orange, Alachua, Palm Beach)
- Total Enrollment: **891**
- Of the total enrolled, 83% were linked to care and 92% received education on prevention and medical adherence

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIV-Infected Individuals Enrolled in Peer Navigation Programs* by Race/Ethnicity, Florida, 2013 (N=891)

*Peer Navigation Programs within local health departments.
Excludes peer programs within community-based organizations.

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Prison Pre-Release Planning Program

- Department of Corrections (DOC) is mandated to test all inmates for HIV within 60 days of their release
- Five DOC Planners provide linkage services to HIV-infected inmates statewide
- **In 2013:**
 - 635 inmates linked to medical and social service appointments.
 - Of the 635, 66% kept their initial medical appointment.
- Inmates returning to Broward, Miami-Dade and Orange counties are connected by the Planners to a Community Linkage Coordinator for more intensive services and support.
- **In 2013:**
 - 195 inmates linked to appointments
 - Of those 195, 85% kept their initial medical appointment.

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Jail Linkage Programs

- The jail linkage programs (JLP) are located in 16 counties
- **In 2013:**
 - 28,061 inmates tested for HIV
 - 144 new positives identified
 - Overall positivity rate 0.51%
 - 21,292 male inmates tested, 108 were positive
 - 6,769 female inmates tested, 36 were positive
 - Overall positivity rate for females higher than males: 0.53% versus 0.51%
 - 706 inmates linked to care
 - 2,102 linkages made (approximately 3 per inmate)
 - 79% of linked inmates kept their initial medical appointments

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Targeted Outreach for Pregnant Women Act (TOPWA)

Currently, there are eight counties with a TOPWA program

- Broward
- Duval
- Hillsborough
- Miami-Dade
- Orange
- Palm Beach
- St. Lucie

During 2013, they accomplished the following:

- Conducted 5,037 Outreach Sessions
- Enrolled 1,964 Women
- Conducted 3,451 Pregnancy Tests
- Conducted 3,337 HIV Tests
- Enrolled 232 HIV-infected Pregnant Women

ZERO positive babies were born to TOPWA mothers in 2013

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state

HIP Condom Distribution Sites, Quantity Distributed and HIV Cases - 2013 (Palm Beach County)

This map displays the geographic distribution of HIV cases and condom distribution sites in Palm Beach County for the year 2013. The map is divided into small geographic units, each labeled with a unique identifier (e.g., 334MX, 334MH, 33438, 33478, 33418, 33412, 33410, 33408, 33403, 33407, 33406, 33405, 33480, 33449, 33467, 33463, 33462, 33426, 33436, 33437, 33435, 33483, 33444, 33496, 33499, 33487, 33498, 33434, 33431, 33428, 33433, 33427, 33486, 33432). The background is color-coded to represent the number of living HIV cases per unit, with a legend indicating five categories: 0-25 (lightest blue), 26-50, 51-100, 101-200, and Over 200 (darkest blue). Red circles of varying sizes are overlaid on the map, representing condom distribution sites. A legend titled 'Condom Sites, Quantities' explains the size of these circles: 0-750 (smallest), 751-2,500, 2,501-5,000, and 5,001-9,500 (largest). A north arrow is located in the bottom right corner of the map.

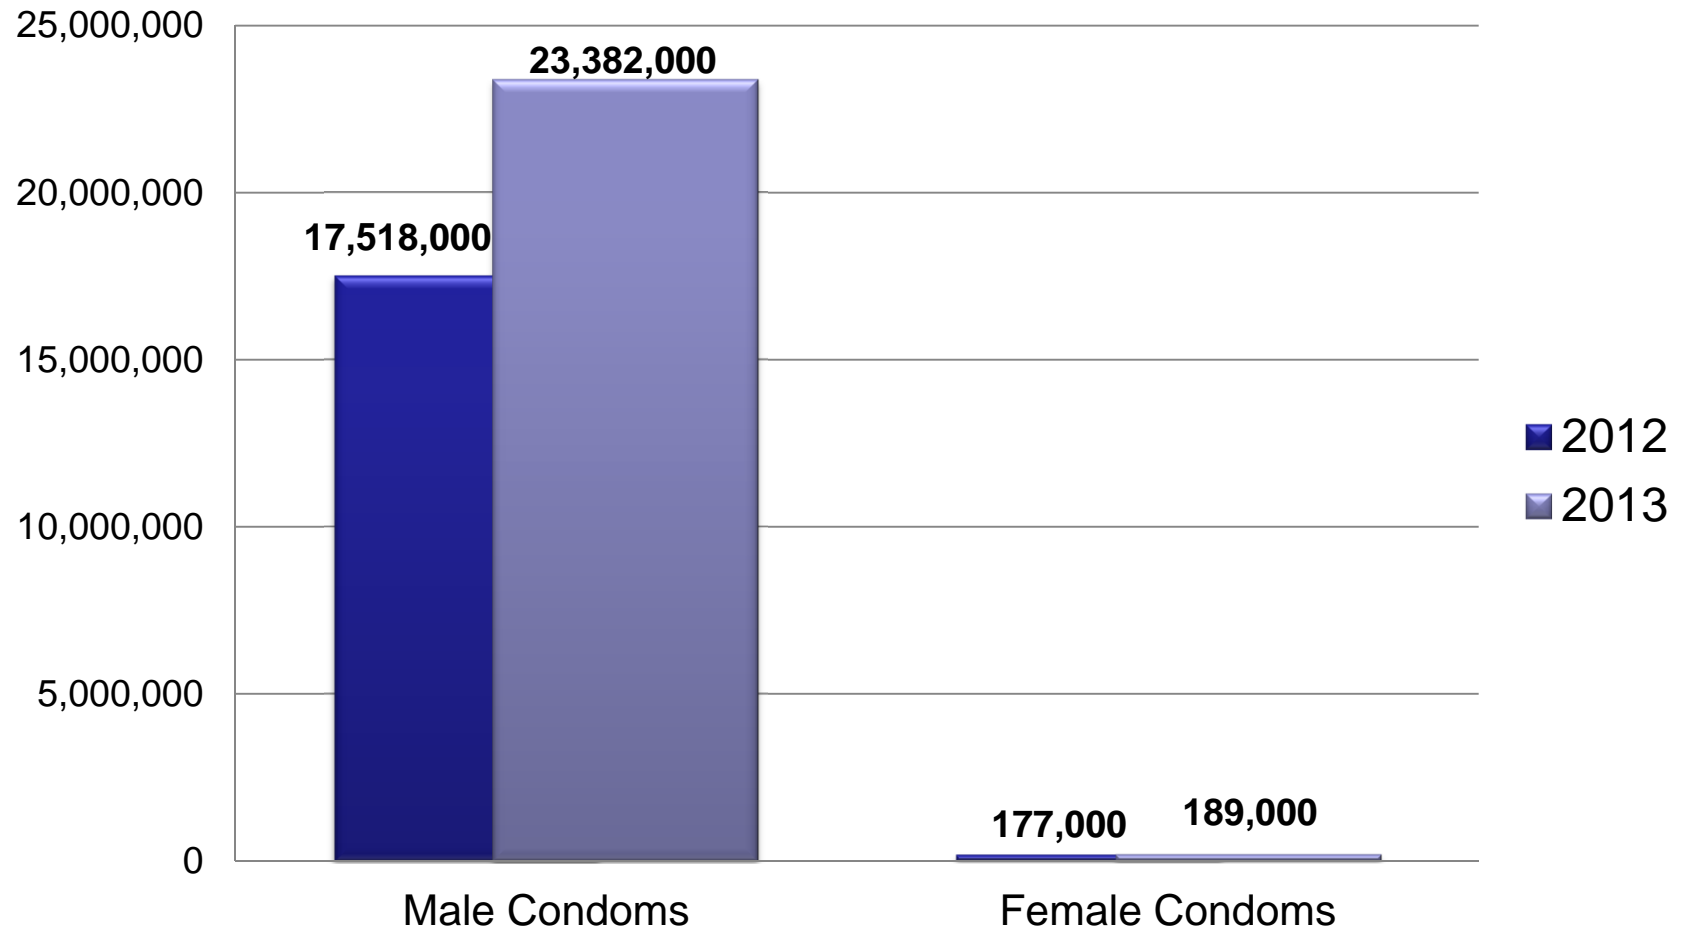

Condom Sites, Quantities

- 0 - 750
- 751 - 2,500
- 2,501 - 5,000
- 5,001 - 9,500

Living HIV Cases

- 0 - 25
- 26 - 50
- 51 - 100
- 101 - 200
- Over 200

Statewide Condom Distribution Totals*, 2012 vs. 2013

* Condoms purchased at headquarters (Tallahassee) and drop-shipped to local health departments, for further distribution to community partners

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP in the Community

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP within CBOs

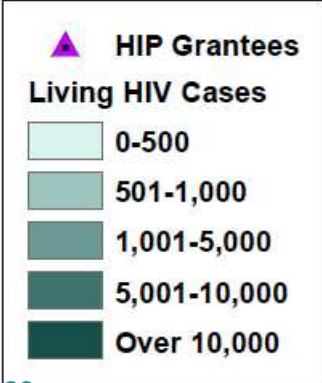

- Total of **38** contracts with **28** agencies
- Contracts funded under HIP RFA (12-006), MSM/Trans RFA (11-017) and local DOH-Broward RFA
- Total funding: **\$7.3 million**
- Began implementation of contracts in July 2012

Division of Disease Control and Health Protection

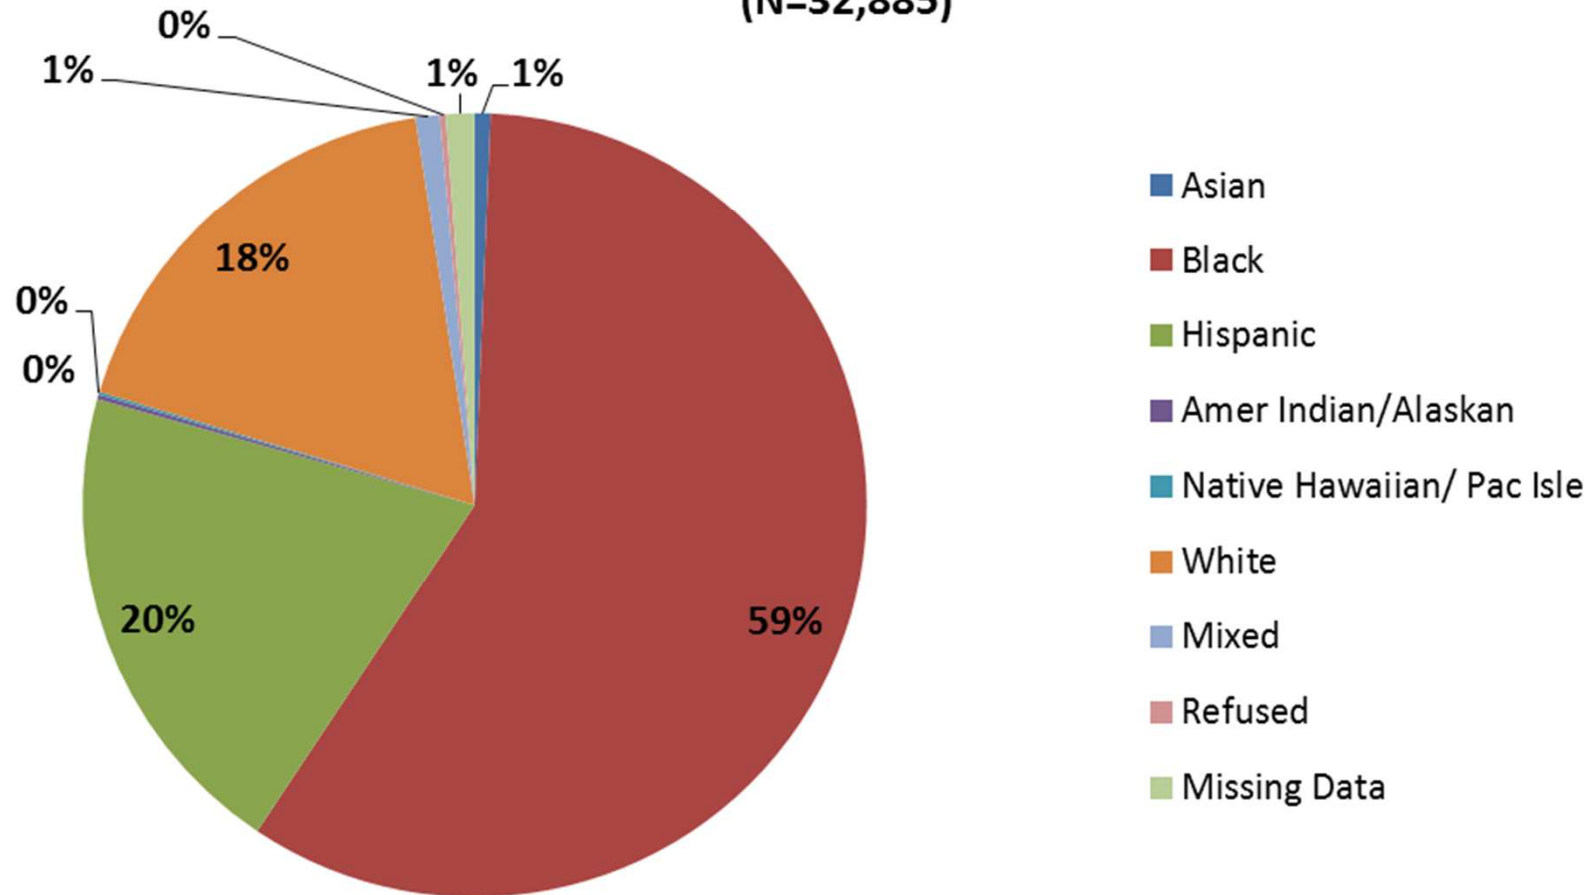

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

High-Impact Prevention (HIP RFA 12-006) Grantee Sites and Living HIV Cases by County, Reported through 2013

**HIV Testing among Funded HIP Providers by Race/Ethnicity,
Florida, 2013
(N=32,885)**

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Interventions

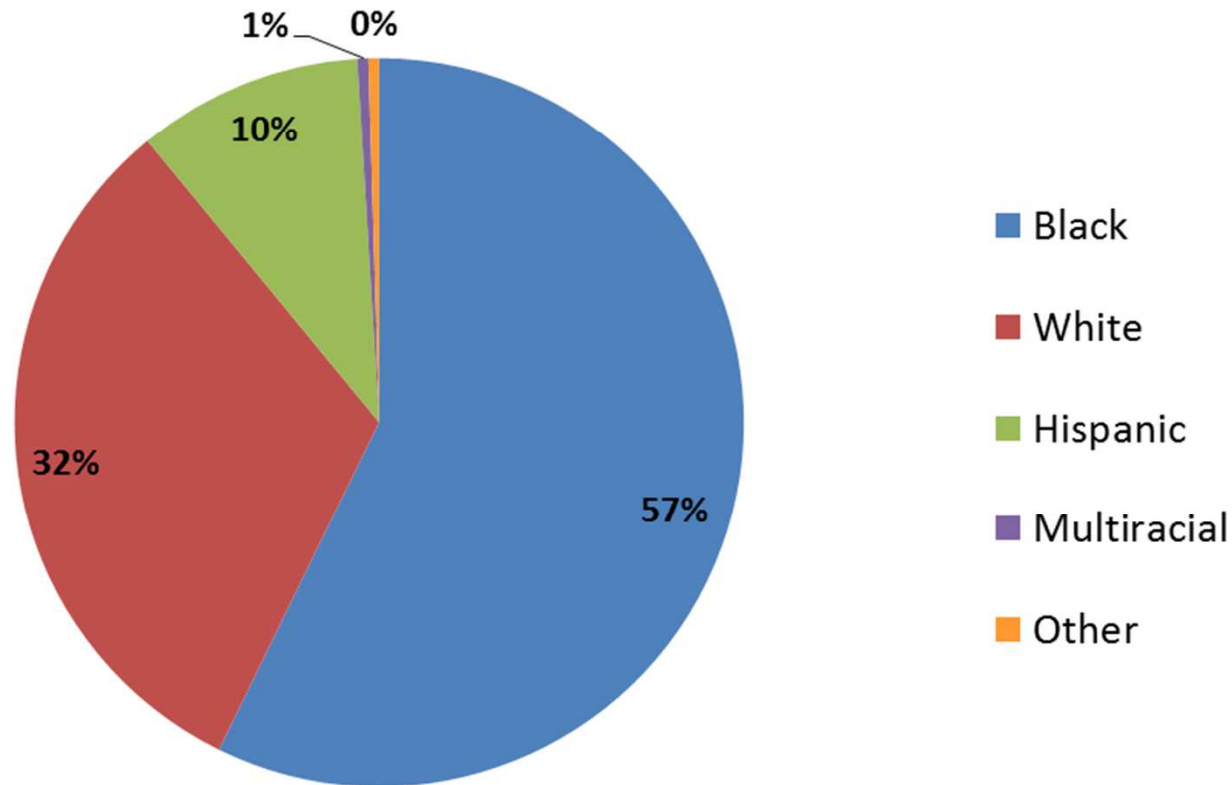

- From 2012 to 2013, the total number of individuals reached through interventions delivered by CBOs decreased, however there was an increase in the proportion of HIV-infected individuals and MSM enrolled, leading to better alignment with **high-impact prevention**.
- Includes evidence-based behavioral interventions, strategies and local adaptations
- In 2012, HIV-infected individuals made up 1.8% of intervention participants; in 2013, this number increased to **81.5%**.
- In 2012, MSM comprised 10.0% of intervention participants; in 2013, this number increased to **40.0%**.

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Individuals Reached through Interventions delivered by Funded CBOs by Race/Ethnicity, 2013 (N=13,132)

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Prevention with Positives Interventions/Strategies

Intervention/Strategy	Participants Reached
ARTAS	338
Brief Group Counseling	180
CLEAR	195
CRCS (HIV-positive)	378
Healthy Relationships	190
LIFE	82
Partnership for Health	6,688
Peer Program	2,462
TOTAL	10,513

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

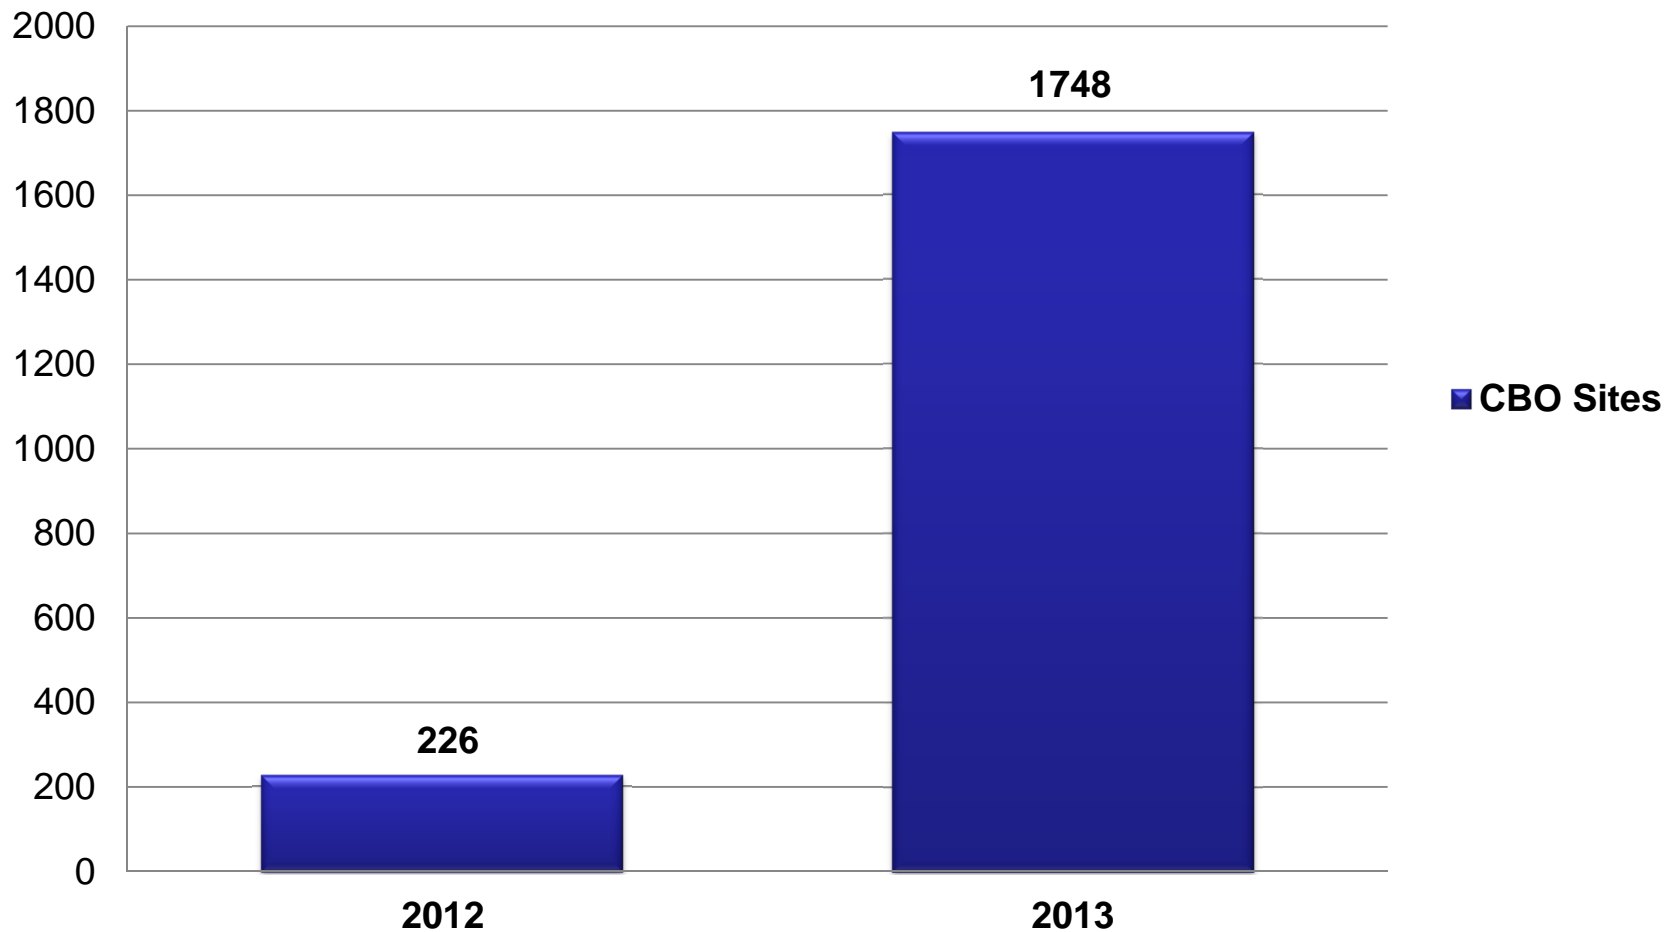

Interventions for High-Risk Negatives

Intervention	Participants Reached
3MV	146
Community PROMISE	600
Mpowerment	312
Personal Cognitive Counseling	206
POL	41
Respect	260
VOICES/VOCES	1,054
TOTAL	2,619

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Number of CBO Condom Distribution Sites, Florida, 2012 vs. 2013

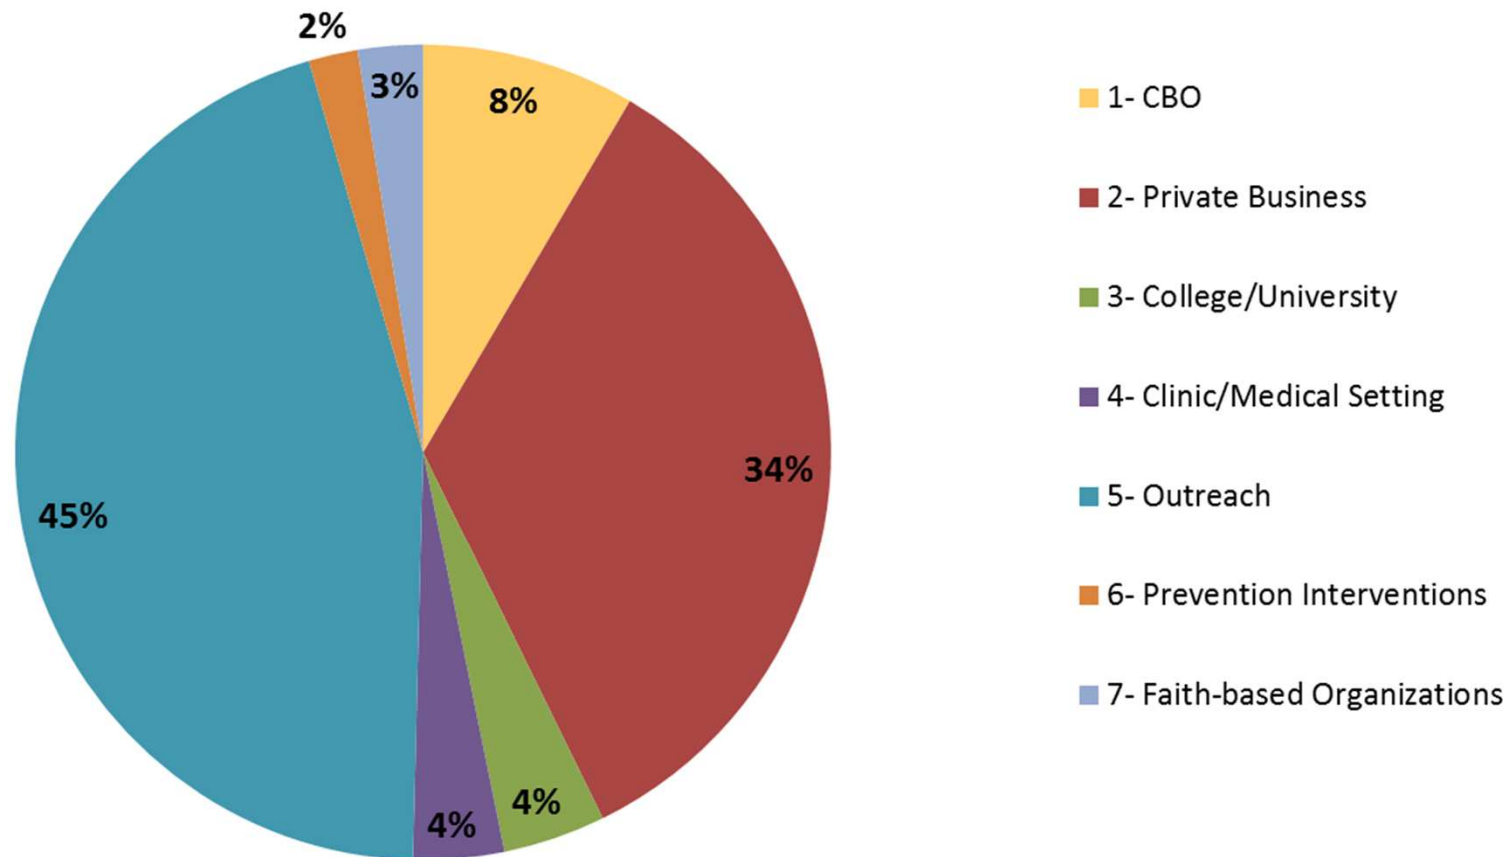

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP CBO Condom Distribution by Site Type, 2013 (N=1,748)

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Outreach

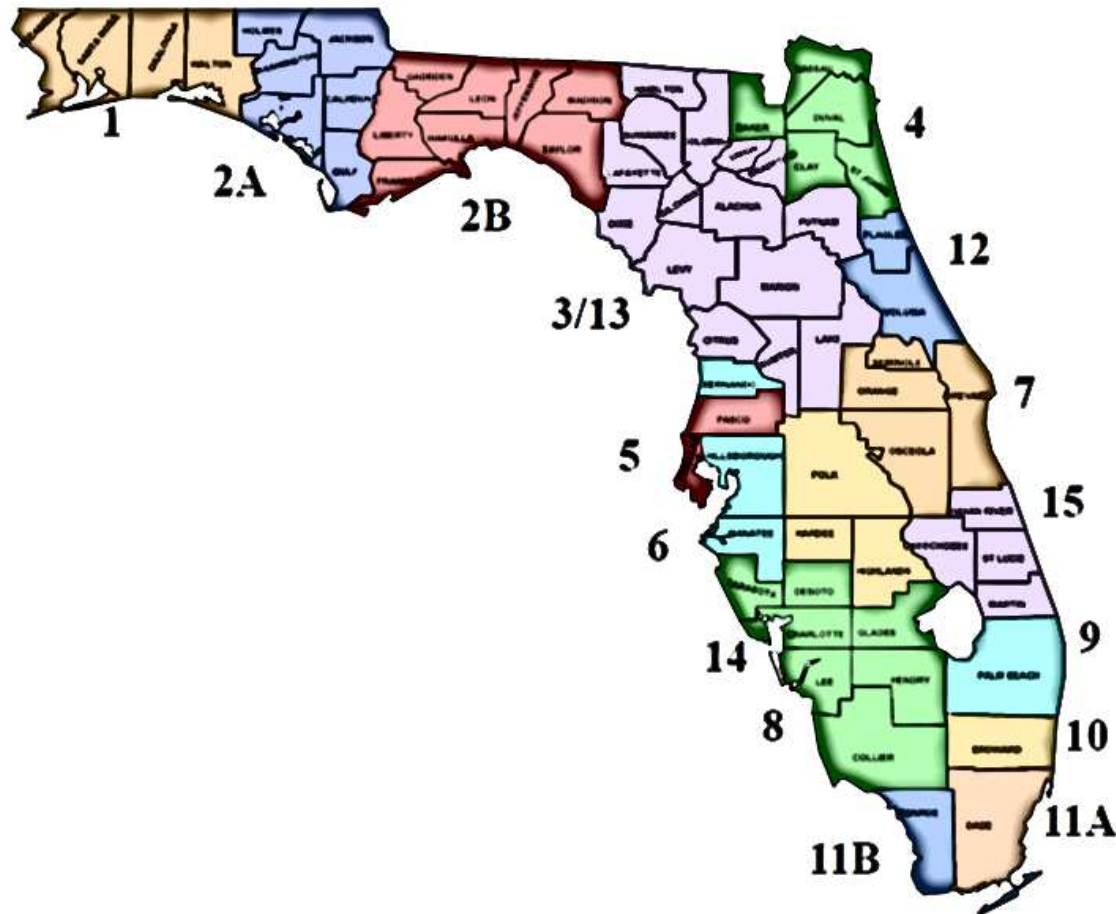

- Total outreach contacts: **160,293**
- Includes both traditional face-to-face and Internet-based outreach
- Increased presence on FB, Twitter and other social media applications (e.g., Grindr) and dating/niche websites (e.g., Adam4Adam) in the form of posts, tweets and live chats

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP within Local Health Departments

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP- Local Health Depts.

- Total HIV tests performed in CHD sites: **188,580**
- Total enrolled in behavioral interventions: **5,928**
 - Prevention with positives interventions*: **3,725**
 - Interventions for high-risk negatives**: **2,203**
- Total outreach contacts: **70,813**

* Includes Healthy Relationships, CRCS, Partnership for Health, Interdiction Project

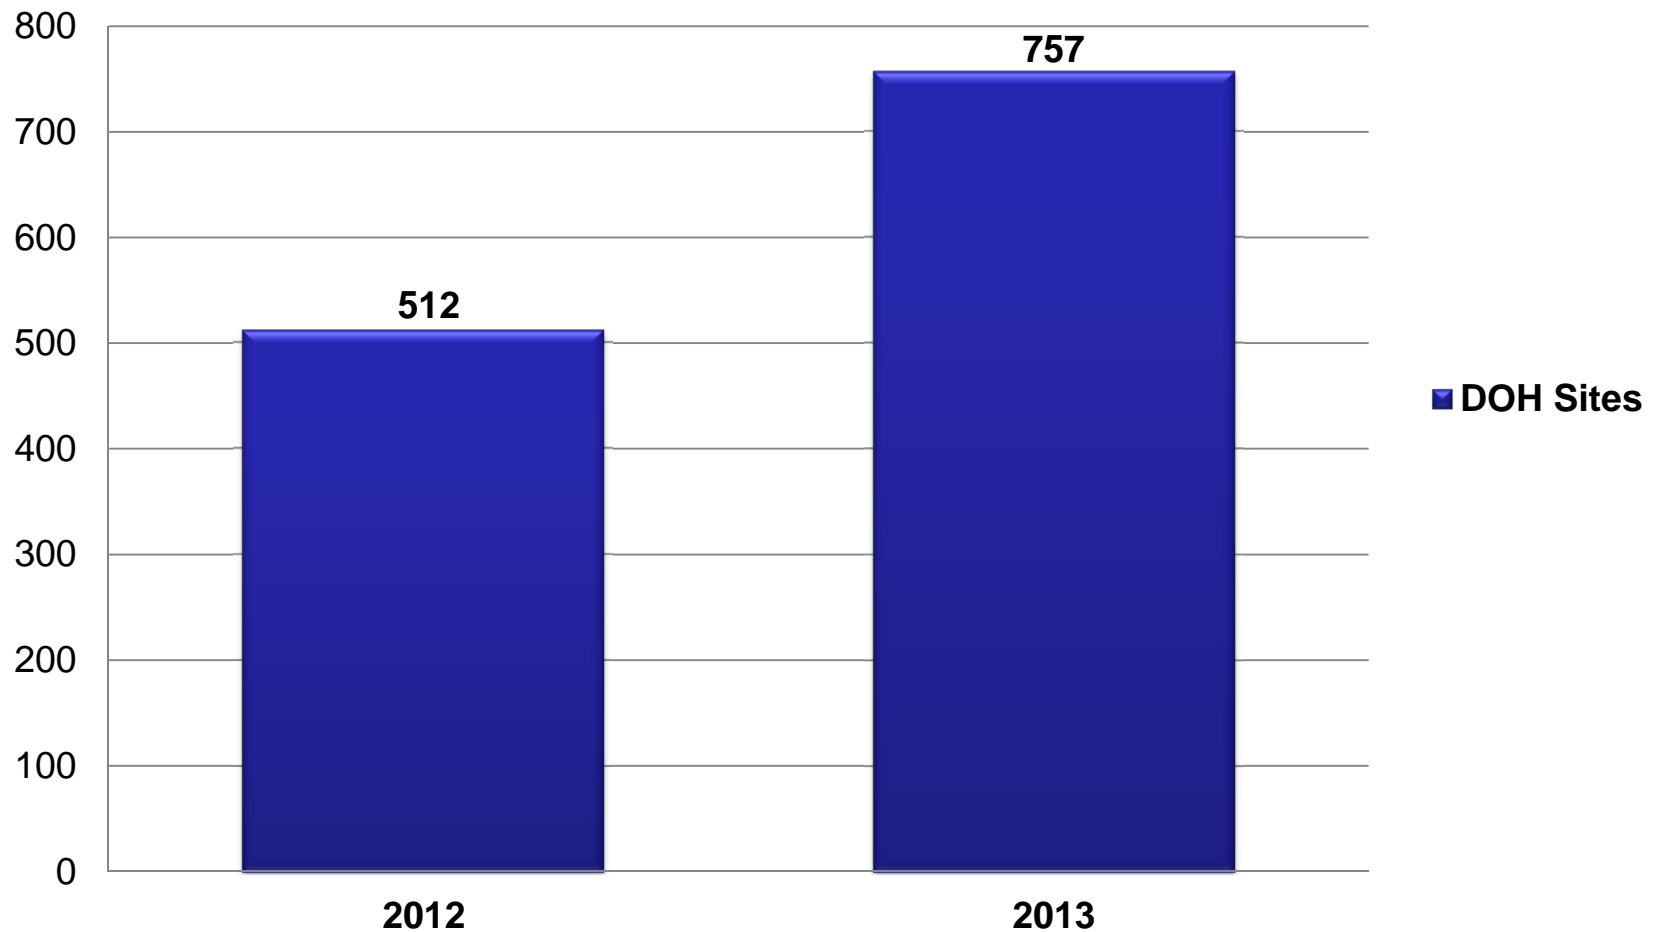

** Includes VOICES/VOCES, Blood Lines, POL, Respect, Safe in the City

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

**Number of DOH Condom Distribution Sites, Florida,
2012 vs. 2013**

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Community Mobilization

- Business Responds to AIDS (BRTA) and Faith Responds to AIDS (FRTA) is based on building partnerships among businesses, health departments, community-based organizations and government agencies to promote the development of comprehensive HIV/AIDS programs.
- **8** CBOs funded to implement BRTA within target communities around the state
- HIP BRTA partners established statewide: **203**
- This number is in addition to the over 200 partnerships maintained through county health department staff over the years.

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

Capacity Building Assistance (CBA) and Intervention Trainings

- CBA trainings held: **23**
- Intervention trainings held: **11**
- Approximate number of individuals attending both CBA and intervention trainings: **680**
- Examples of CBA trainings include: MSM Cultural Competency; Finding Positives; Outreach, Recruitment and Retention; Transgender Cultural Competency; Motivational Interviewing; Board Development; Leadership Development

Division of Disease Control and Health Protection

To protect, promote and improve the health of all people in Florida through integrated state, county, and community efforts.

HIP YEAR 1 IN REVIEW

care | resource

OUR HIP GOALS – OVERVIEW

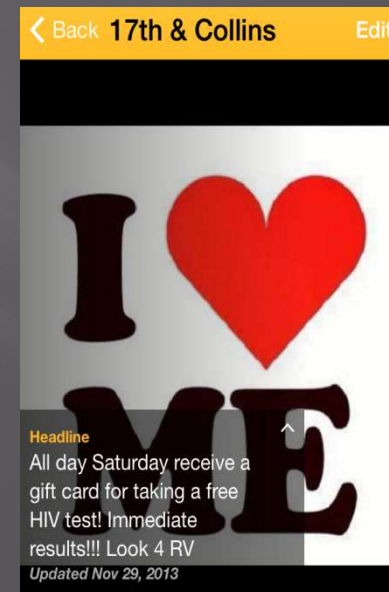

- Conduct 1800 HIV tests
- Distribute 63000 condoms
- Conduct 2500 face to face outreach
- Conduct 1500 prevention themed chats
- Enroll 152 HIV-infected individuals in the ARTAS intervention

BEST PRACTICES: HIV TESTING

- 🚫 Ongoing site recruitment process
- 🚫 Regular assessment of existing sites
- 🚫 Integration of the other program components at all major events :

HIV testing + FTF outreach & condom distribution + Internet Outreach

INTERNET OUTREACH: WHAT WORKED FOR US

 Success of this component depends greatly on the profile of your outreach staff : good conversationalist, non judgmental, preferably someone greatly exposed to social media (for personal or professional use)

 Accounts were established on mainstream social media sites, dating sites, hookup sites and Craigslist

 Several individual profiles were established, matching the gender & demographics of the target population on each site; individual profiles were found to be more personable, more conversational, more relatable than agency profiles

 Emphasis was placed on work being a large factor in the profile description sections : great conversation starter, leads to talking about HIV and what your agency does

OkCupid Profile:

My self-summary

So I work 24/7. My friends are constantly complaining about this fact because no matter where I am or who I am with I bring up my job. If this bothers you go away :)

What I'm doing with my life

I work in the health field mainly in Wilton Manors but in Miami as well. I feel that if people honestly talked more about health issues and prevention we wouldn't have 1/2 of the issues we do down here.

I'm really good at

Talking up I am a good speaker and do a lot of public speaking.

The first things people usually notice about me

Hmm I am not sure it depends on who you ask.

My Details

Last online: Online now!
 Orientation: Bisexual
 Ethnicity: Other
 Height: —
 Body type: Average
 Diet: Mostly anything
 Smoker: No
 Drinks: Not at all
 Drugs: Never
 Religion: —
 Sign: Gemini, and it's fun to think about

Chat Messages:

Nothing today, just here at work; tired. Lucky I love what I do or I'd be passing out. Lol.

❌ Okcupid , A4A ,& grindr profiles using “work” to trigger other questions that lead to HIV/STD discussions

❌ In Year 1, such conversations resulted in:

- ❌ An increase in foot traffic in our Broward facility
- ❌ Testing and Linkage to Care of newly diagnosed individuals

ARTAS : Successful Linkage to MEDICAL Care

Same Day Access of Services

- ARTAS intake
- Care Resource Registration
- Complete Ryan White Eligibility

Short Time Frame for Access of Services

- Clients linked approximately 1-7 days
 - Labs
 - Medical
 - Case Management
- All pertinent documentation provided
 - HIV status
 - Income
 - Broward County Resident

ARTAS : Successful Linkage to MEDICAL Care

❧ Collaboration of Services/Client Centered Approach

- ❧ Pharmacy Services
- ❧ Prevention Services
- ❧ Case Management
- ❧ Medical

❧ Follow up

- ❧ Monitors adherence to medical appointments
- ❧ Constant communication

Jacksonville Area Sexual Minority Youth Network

JASMYN HIP: Year One in Review
April 17, 2014

MISSION

To support and empower lesbian, gay, bisexual, transgender and questioning (LGBTQ) youth by creating safe space, providing youth development services and bringing people and resources together to promote diversity and human rights.

Jacksonville Area Sexual Minority Youth Network

Target Populations and Risk Factors for HIV

Target Population

- Gay, Bisexual, Transgender, Questioning and other young men who have sex with men (YMSM), ages 18 – 23
- Very High risk for HIV
- Primarily African American and mixed race; some white

HIV / STD Risk Factors in Duval County

- YMSM very high risk for HIV and STDs due to the prevalence of disease
- Duval has the fifth highest rate of adolescents with HIV in Florida
- JASMYN's rate of positivity in the HIV testing ranges from 4 – 8%
- Duval has one of the highest rates of STDs in Florida
- Transgender youth at very high risk

Jacksonville Area Sexual Minority Youth Network

JASMYN's HIP Program Includes

- HIV Testing/Linkage
- Healthy Relationships (adapted for younger MSM ages 18-23)
- Condom Distribution
- Staff lead outreach to Apps and Sites where YMSM may find partners
- YMSM perform outreach via social media (Facebook, Twitter, Instagram) etc. to their own peer networks
- Tech surveys to keep up with trends/plan

Jacksonville Area Sexual Minority Youth Network

HIV Testing/Linkage

- 74 HIV tests conducted on YMSM ages 18-23 under Site 12-589 in 2013 (2.7% positivity)
- 151 HIV Tests conducted on YMSM ages 13-23 under Site 12-190 in 2013 (6.6% positivity)
- 81 Tests conducted on Non-MSM ages 13-24 (no positivity)
- All HIV Positive Clients linked to medical and other services

Jacksonville Area Sexual Minority Youth Network

Healthy Relationships

- Ran two adapted cycles
- Adaptation included two extra sessions for youth to process/receive support
- YMSM to given support/information on how/when to disclose status
- 12 HIV+ YMSM completed at least 4/5 core sessions in 2013
- Helped bring new HIV positive YMSM to services and also kept them engaged in care.

Jacksonville Area Sexual Minority Youth Network

Condom Distribution

- Gave out over 14,000 condoms via this project.
- Estimated that a third of the condoms went to YMSM who were HIV positive.

Staff lead online outreach

- 1927 contacts made online with YMSM using Apps or internet sites used to meet other MSM in 2013
- Primarily reached out on Jack'd, Grindr, and Skout in 2013.
- Encountered issues on Adam 4 Adam.
- Had several youth come in for HIV/STD testing directly after being contacted. Even a few within an hour of being contacted
- Often able to engage in meaningful dialogs online that raise awareness and educate.

Jacksonville Area Sexual Minority Youth Network

"Thanks and that's very good of you and admirable.
Also thank you for sharing information on your STD
clinic, that is another battle."

- 20 year old MSM on Grindr

Jacksonville Area Sexual Minority Youth Network

FYTT Team (Facebook, You Tube, Twitter, Tumblr)

- Based on POL model
- Use JASMYN YMSM who have been through previous HIV prevention education programs
- Gather at least 10 YMSM together for one night per quarter and have each of them send out prevention/testing messages to 50 YMSM in their peer group via Social Media.
- Youth design simple prevention messages using JASMYN I-pads, computers.
- 2354 messages sent out
